

WEBVTT

1

00:00:02.270 --> 00:00:02.860

Richard Hoehn: Thank you.

2

00:00:06.790 --> 00:00:09.350

Richard Hoehn: Hector, you're not. We can't hear you. Very well.

3

00:00:11.163 --> 00:00:13.980

Hector Rogel Jr.: I'm currently at Walmart right now. Sorry about that.

4

00:00:14.390 --> 00:00:16.620

Richard Hoehn: Okay, no worries.

5

00:00:23.570 --> 00:00:29.070

Richard Hoehn: Yeah. Let me see. Actually, I did some work that I guess I need to push up.

6

00:00:30.870 --> 00:00:31.800

Hector Rogel Jr.: Multiple countries.

7

00:00:39.130 --> 00:00:40.990

Richard Hoehn: The good thing is right. We

8

00:00:41.620 --> 00:00:46.639

Richard Hoehn: we've got a little bit of time to do our report.

9

00:00:48.490 --> 00:00:51.150

Richard Hoehn: so we're more just talking about

10

00:00:52.040 --> 00:00:57.849

Richard Hoehn: trying to divvy, to make sure we're all on the same page. What we're working on is is that.

11

00:00:58.590 --> 00:01:00.539

Hector Rogel Jr.: Maybe we should think.

12

00:01:02.110 --> 00:01:04.059

Isaiah: Yeah, that's kind of what I was thinking.

13

00:01:12.780 --> 00:01:17.930

Isaiah: One looks a lot more attainable than the last project that we had.

14

00:01:18.770 --> 00:01:24.180

Richard Hoehn: Yeah, yeah, yeah, I haven't. I haven't received any grades. So.

15

00:01:25.250 --> 00:01:25.840

Karson Woods: No.

16

00:01:25.880 --> 00:01:32.377

Richard Hoehn: No, I I took the last exam in a hotel room.

17

00:01:32.830 --> 00:01:33.380

Isaiah: No.

18

00:01:33.380 --> 00:01:43.460

Richard Hoehn: Murphy's law and the fire alarm got tested and like it's like I was doing like this kind of figured. I couldn't get away.

19

00:01:43.690 --> 00:01:44.350

Karson Woods: No.

20

00:01:44.350 --> 00:01:45.320

Isaiah: Oh, that's awful!

21

00:01:45.627 --> 00:01:57.293

Richard Hoehn: And so I I actually emailed Dr. Wall and said, Hey, I don't know but I'm gonna get flagged on this one. And he said, Yeah, you got flagged. But for looking away from your computer, I'm like.

22

00:01:58.084 --> 00:02:04.570

Richard Hoehn: And, by the way, during these tests, I'm kind of staring at the ceiling, trying to think what I should write so.

23

00:02:05.160 --> 00:02:07.440

Richard Hoehn: What they think you're doing.

24

00:02:08.259 --> 00:02:11.959

Karson Woods: I definitely got like the last test, but it is what it is.

25

00:02:12.680 --> 00:02:20.479

Richard Hoehn: Yeah, I mean, oddly, I I didn't talk to anybody. I have to show my workstation on the second exam.

26

00:02:20.740 --> 00:02:22.640

Karson Woods: That was kind of odd.

27

00:02:23.300 --> 00:02:27.539

Richard Hoehn: So I I don't know if that's good or bad, or if they just gave up on that.

28

00:02:28.470 --> 00:02:31.499

Isaiah: No, I had a lot of exams in undergrad that were more like that.

29

00:02:31.620 --> 00:02:35.590

Isaiah: You did like the weird proctor software. But like nobody actually watched.

30

00:02:36.130 --> 00:02:41.580

Richard Hoehn: Yeah, I mean, I'm sure they're using some AI and watching your eyes, and maybe

31

00:02:41.930 --> 00:02:46.429

Richard Hoehn: recording you, or or or or something like that. I'm guessing.

32

00:02:48.200 --> 00:02:48.790

Richard Hoehn: Yeah.

33

00:02:50.630 --> 00:02:52.840

Richard Hoehn: But let me see.

34

00:02:59.430 --> 00:03:04.720

Richard Hoehn: okay, so just that we're on the same page. So I think I said, I'm gonna try and make it bad.

35

00:03:08.460 --> 00:03:15.820

Richard Hoehn: I'm gonna make it bad visualization trying to

36

00:03:16.270 --> 00:03:20.119

Richard Hoehn: make a case for where you embark somehow.

37

00:03:21.950 --> 00:03:25.690

Richard Hoehn: Is that okay, guys? I mean, that will be maybe one or 2.

38

00:03:25.800 --> 00:03:29.430

Richard Hoehn: I kind of worked on it some.

39

00:03:42.410 --> 00:03:45.180

Hector Rogel Jr.: So are we working any cow database?

40

00:03:46.380 --> 00:03:47.449

Isaiah: We're working with, what.

41

00:03:47.700 --> 00:03:48.479

Karson Woods: For the cataly.

42

00:03:48.480 --> 00:03:49.280

Hector Rogel Jr.: Database.

43

00:03:49.450 --> 00:03:49.840

Karson Woods: Yeah.

44

00:03:50.660 --> 00:03:51.350

Hector Rogel Jr.: Okay.

45

00:03:51.540 --> 00:03:57.030

Richard Hoehn: We? I'm using whatever Csv, I think you

46

00:03:57.310 --> 00:04:02.060

Richard Hoehn: downloaded and put into the data folder. Right? That that's that's what I'm using.

47

00:04:03.500 --> 00:04:07.230

Isaiah: I don't think it really matters what we're using. I think it's more of what we do.

48

00:04:07.780 --> 00:04:15.319

Richard Hoehn: Yeah, yeah, because I saw actually, Hector, yeah, you used

49

00:04:16.399 --> 00:04:22.259

Richard Hoehn: somehow. You can just say that was really interesting. You just said, Sns load data set

50

00:04:22.400 --> 00:04:24.729

Richard Hoehn: titanic, and it just loaded it.

51

00:04:25.350 --> 00:04:26.320

Richard Hoehn: That's cool.

52

00:04:34.260 --> 00:04:36.649

Isaiah: Yeah. But I was just using whatever Csv, that was.

53

00:04:37.560 --> 00:04:39.500

Isaiah: I think that this is the same as this.

54

00:04:40.890 --> 00:04:42.170

Richard Hoehn: Okay.

55

00:04:48.910 --> 00:04:55.089

Richard Hoehn: So the good thing is, I I am recording. And I've got that AI campaign going on. So

56

00:04:55.550 --> 00:04:58.790

Richard Hoehn: after our call today.

57

00:04:59.400 --> 00:05:03.540

Richard Hoehn: What we didn't do last time. But I'll do it this time is I can make a Pdf

58

00:05:03.670 --> 00:05:06.150

Richard Hoehn: of the actual transcript.

59

00:05:06.400 --> 00:05:08.000

Isaiah: And I'll also.

60

00:05:08.818 --> 00:05:14.109

Richard Hoehn: Upload the the summary, and then I think we have that for week. 8.

61

00:05:14.460 --> 00:05:22.969

Richard Hoehn: Would that? And and then we could even upload our discussion list. Maybe tomorrow, you know. Pdf, and then do that.

62

00:05:24.520 --> 00:05:25.539

Richard Hoehn: and then.

63

00:05:26.010 --> 00:05:31.779

Richard Hoehn: But there was nothing else we had to send them. Or do we need to send them a github link again. Maybe.

64

00:05:32.677 --> 00:05:36.009

Isaiah: Let me check. I think I already submitted that to the dropbox.

65

00:05:37.720 --> 00:05:39.439

Richard Hoehn: Oh, you already did the drop, though.

66

00:05:40.096 --> 00:05:40.649

Isaiah: Think so.

67

00:05:41.230 --> 00:05:43.200

Isaiah: I did it like right after I created it.

68

00:05:45.620 --> 00:05:48.870

Richard Hoehn: I'm I'm logging into my account right

69

00:06:01.500 --> 00:06:04.180

Richard Hoehn: mad. This class is a bear. I tell you, guys.

70

00:06:04.710 --> 00:06:05.752

Karson Woods: It really is.

71

00:06:23.520 --> 00:06:27.045

Richard Hoehn: Do we have to do again that

72

00:06:28.580 --> 00:06:30.504

Richard Hoehn: What was that called that?

73

00:06:31.780 --> 00:06:36.469

Richard Hoehn: personal reflection thing? Or is it not do this time.

74

00:06:36.470 --> 00:06:38.049

Karson Woods: Is due. Next week.

75

00:06:38.950 --> 00:06:43.410

Richard Hoehn: Oh, you look at this. Yeah. Individual reflection templates. So we have to do that again.

76

00:06:43.410 --> 00:06:46.700

Karson Woods: Yeah, I think it's for every single one that we'll have to do that.

77

00:06:48.030 --> 00:06:48.980

Richard Hoehn: Okay.

78

00:07:12.700 --> 00:07:16.780

Isaiah: Yeah. But I think if we do that, then we've covered basically on our basis.

79

00:07:20.193 --> 00:07:25.570

Isaiah: So for our report, we're each just gonna write a summary like the the paragraph summary for the visualizations.

80

00:07:26.980 --> 00:07:27.890

Karson Woods: Yeah.

81

00:07:28.560 --> 00:07:32.032

Isaiah: Yeah, I wish we would have got feedback, because I.

82

00:07:32.630 --> 00:07:41.259

Richard Hoehn: I don't know. You know our paper probably. Wasn't that great? I think we would all agree, you know.

83

00:07:41.440 --> 00:07:42.549

Isaiah: It could have been better.

84

00:07:42.550 --> 00:07:43.820

Richard Hoehn: Yeah, yeah.

85

00:07:43.870 --> 00:07:48.927

Richard Hoehn: And I, I actually think it's really painful

86

00:07:50.050 --> 00:07:57.360

Richard Hoehn: writing with this track changes is on because it's so much colors. And it moves it around. I don't think it's actually very

87

00:07:57.950 --> 00:08:01.009

Richard Hoehn: kind of easy to work with it all.

88

00:08:01.010 --> 00:08:01.940

Isaiah: It is annoying.

89

00:08:05.730 --> 00:08:10.429

Isaiah: We use. Google talks not not for this one, but maybe in the future, is that as.

90

00:08:10.810 --> 00:08:11.560

Richard Hoehn: Yeah.

91

00:08:11.560 --> 00:08:14.499

Isaiah: Change tracking is cumbersome. With that I haven't used it.

92

00:08:14.760 --> 00:08:24.302

Richard Hoehn: Yeah, I mean, I'm fine with we may. We'll we'll stay the course with, I guess, this one right. But we could. We could switch to Google. She word, Doc,

93

00:08:24.870 --> 00:08:26.940

Richard Hoehn: or next one, because it just

94

00:08:27.140 --> 00:08:33.220

Richard Hoehn: it just always has track changes on. I think it just keeps track of what gets edited.

95

00:08:33.700 --> 00:08:34.820

Richard Hoehn: I'm not mistaken.

96

00:08:35.289 --> 00:08:42.329

Karson Woods: Hmm, yeah. That works for me. You're just using Google docs.

97

00:09:02.210 --> 00:09:03.420

Richard Hoehn: I guess. Hutter.

98

00:09:04.280 --> 00:09:12.429

Richard Hoehn: Yeah. Other than that, we don't have too much to discuss. Is there anything going on tomorrow that we need to be prepared for.

99

00:09:14.218 --> 00:09:21.589

Karson Woods: Not that I'm aware of, I think probably just like going over the reading, most likely, and then probably initial.

100

00:09:21.740 --> 00:09:24.250

Karson Woods: like what we're doing for our project initially.

101

00:09:38.450 --> 00:09:40.210

Richard Hoehn: I'm kind of reading it right now.

102

00:09:57.750 --> 00:10:01.439

Isaiah: Carson, do you have access to the yeah repo?

103

00:10:01.940 --> 00:10:06.829

Karson Woods: I think I do. Let me try to create a follow right quick, just to make sure.

104

00:10:11.480 --> 00:10:14.499

Isaiah: Yeah. So I just wanna make sure that you got you get on this one.

105

00:10:27.400 --> 00:10:27.990

Karson Woods: Hmm!

106

00:10:31.450 --> 00:10:32.160

Karson Woods: Right.

107

00:10:34.050 --> 00:10:41.009

Karson Woods: I don't even see you as a contributor yet. I guess you need to upload something to the repo.

108

00:10:41.010 --> 00:10:42.599

Karson Woods: enable test file.

109

00:10:43.560 --> 00:10:47.540

Isaiah: I can see him as a collaborator. The access it.

110

00:10:47.690 --> 00:10:48.440

Isaiah: It's nice.

111

00:10:56.050 --> 00:10:58.759

Karson Woods: I don't know if I did this in the right spot, but

112

00:11:04.940 --> 00:11:06.209

Karson Woods: I'm not. Hmm.

113

00:11:06.560 --> 00:11:10.959

Karson Woods: I think the one that was not like actually making changes.

114

00:11:14.600 --> 00:11:24.850

Richard Hoehn: Easiest, easiest is, you know, you just open up one of the read me say, under code or so, or under collaboration. You can modify it.

115

00:11:25.460 --> 00:11:26.179

Richard Hoehn: No problem

116

00:11:31.290 --> 00:11:41.519

Richard Hoehn: like Get needs a file in a folder. That's why I kind of put the placeholder read me in the collaboration folder. Just just did it it create. Otherwise it won't create the folder.

117

00:11:43.840 --> 00:11:49.680

Karson Woods: Yeah, I just tried to like commit to something, I guess, like the code section. But

118

00:11:50.400 --> 00:11:53.349

Karson Woods: I'm not seeing what I tried to commit.

119

00:11:53.350 --> 00:12:03.000

Richard Hoehn: Well you might, you might have committed, but then you need to publish it, or push it to to master like you might have committed it to your local branch.

120

00:12:03.130 --> 00:12:04.530

Richard Hoehn: Where are you online.

121

00:12:05.290 --> 00:12:07.890

Karson Woods: I'm on the desk. I mean, online.

122

00:12:09.160 --> 00:12:10.789

Isaiah: You want to share your screen.

123

00:12:12.760 --> 00:12:14.660

Karson Woods: No screen sharing is disabled.

124

00:12:15.070 --> 00:12:17.490

Richard Hoehn: Oh, sorry, my bad! Let me see.

125

00:12:28.390 --> 00:12:31.209

Richard Hoehn: I don't know. Like is it still disabled?

126

00:12:31.610 --> 00:12:33.249

Karson Woods: Oh, no, I can share now.

127

00:12:46.210 --> 00:12:51.780

Karson Woods: What I tried to do earlier was just add file and just create new file. That's what I tried doing.

128

00:12:52.420 --> 00:12:54.470

Richard Hoehn: Okay. Never done that.

129

00:12:56.810 --> 00:12:59.730

Karson Woods: How do you guys normally upload? Then I guess.

130

00:13:01.170 --> 00:13:06.879

Richard Hoehn: So usually the way I work is, I have it on my

131

00:13:07.360 --> 00:13:12.690

Richard Hoehn: my local machine. I cloned the repository to my local machine.

132

00:13:12.820 --> 00:13:14.570

Richard Hoehn: Do you have gifts.

133

00:13:14.840 --> 00:13:18.739

Karson Woods: Yeah, I have the desktop version, too. I just haven't.

134

00:13:19.230 --> 00:13:26.570

Richard Hoehn: Have you ever used it? It's really cool, like, if if you have it, I'll I could show you a trick real quick if you if you boot it up.

135

00:13:27.030 --> 00:13:36.455

Karson Woods: Yeah, I'm cloning it right quick. Actually, I'll just share it right quick. Let me change alright.

136

00:13:37.630 --> 00:13:39.350

Richard Hoehn: So so

137

00:13:44.230 --> 00:13:47.460

Richard Hoehn: can you click on history for a second. There, top left. Yeah.

138

00:13:48.050 --> 00:13:56.549

Richard Hoehn: Okay, good. Okay. So you did. You've pulled my, you? Oh, fetch origin. Click on that top right? Yeah, there, hit that.

139

00:13:57.230 --> 00:13:58.110

Richard Hoehn: Okay.

140

00:13:58.330 --> 00:14:00.330

Richard Hoehn: So you've you've done it. Now cool.

141

00:14:00.930 --> 00:14:10.919

Richard Hoehn: So now click on this tiny little arrow, where? Where it is data visualization, the downward arrow. Yeah.

142

00:14:11.180 --> 00:14:18.480

Richard Hoehn: And then right click, like, where is where did you put this repository? If you right click on

143

00:14:18.600 --> 00:14:22.750

Richard Hoehn: Ims like the where it's grayed out, that Republican, can you?

144

00:14:23.110 --> 00:14:31.030

Richard Hoehn: Sometimes it can show where it is, github data. So wherever that github data

145

00:14:31.510 --> 00:14:35.660

Richard Hoehn: that that folder is there, you should be able to open that folder.

146

00:14:38.460 --> 00:14:42.360

Karson Woods: Oh, wait! Let me open so on my desktop. Just open up that folder.

147

00:14:43.370 --> 00:14:53.310

Richard Hoehn: Yeah, yeah, like on your computer. I think I can't remember exactly. Somehow there's a folder called Github, and then there's another folder with the name of our repository

148

00:14:53.910 --> 00:14:57.370

Richard Hoehn: all over, like it's under documents, you know, under documents

149

00:14:57.860 --> 00:14:59.780

Richard Hoehn: there. So you should be able to open up.

150

00:15:01.090 --> 00:15:02.010

Karson Woods: Okay.

151

00:15:02.010 --> 00:15:03.500

Richard Hoehn: Your file explorer.

152

00:15:05.060 --> 00:15:08.650

Isaiah: And then if you add a folder, or if you add folders, or you add files.

153

00:15:09.820 --> 00:15:11.479

Isaiah: they'll show up here.

154

00:15:13.090 --> 00:15:14.100

Karson Woods: Okay.

155

00:15:14.640 --> 00:15:18.730

Richard Hoehn: Well, you have to. You have to commit it, and then you push it. Kind of thing.

156

00:15:18.730 --> 00:15:24.899

Karson Woods: Okay, so to commit it, then I would have to.

157

00:15:25.410 --> 00:15:30.800

Richard Hoehn: You have to like. If you don't mind, why don't you open up a folder and just we'll create an empty file or something.

158

00:15:30.800 --> 00:15:34.879

Karson Woods: I just put an empty folder into the code section.

159

00:15:34.880 --> 00:15:42.990

Richard Hoehn: Yeah. So Co. Folders aren't files so it won't show up. You need to have a a folder with a file in it.

160

00:15:43.320 --> 00:15:44.480

Karson Woods: Okay. I'll just.

161

00:15:44.480 --> 00:15:47.890

Richard Hoehn: Just the get thing, because a folder is really

162

00:15:48.430 --> 00:15:53.520

Richard Hoehn: yeah, I mean, I guess they think of it as nothing. There's nothing to.

163

00:15:54.120 --> 00:15:55.909

Richard Hoehn: And it's there a folder.

164

00:15:56.920 --> 00:16:00.640

Karson Woods: I'm just creating a Jupiter notebook right quick, I guess.

165

00:16:00.640 --> 00:16:03.289

Richard Hoehn: Yeah, just even an empty one.

166

00:16:17.590 --> 00:16:22.239

Karson Woods: Okay? And then, okay, I have an empty file in that folder now and then to commit.

167

00:16:22.240 --> 00:16:24.830

Richard Hoehn: Changes there, see that changes, has a 1.

168

00:16:25.140 --> 00:16:25.920

Karson Woods: Yeah.

169

00:16:26.310 --> 00:16:30.649

Richard Hoehn: And so now you can commit it to main. See that blue button and

170

00:16:31.040 --> 00:16:35.240

Richard Hoehn: the name, but it already kind of knows that you just create. So you hit, commit.

171

00:16:36.110 --> 00:16:42.679

Richard Hoehn: So you put it on your main. And now with the push to origin the top one, yeah, or there, too. That's fine.

172

00:16:42.680 --> 00:16:43.140

Karson Woods: Yeah.

173

00:16:43.140 --> 00:16:45.810

Richard Hoehn: You're pushing it to the web right? Kind of thing.

174

00:16:46.000 --> 00:16:46.710

Karson Woods: Okay.

175

00:16:46.710 --> 00:16:49.780

Richard Hoehn: Yeah. And now, if I refresh on the web.

176

00:16:51.180 --> 00:16:53.309

Richard Hoehn: sure enough, I can see your commit.

177

00:16:53.650 --> 00:16:55.890

Karson Woods: Okay, there you go. That works. Okay.

178

00:16:55.890 --> 00:16:56.500

Richard Hoehn: No.

179

00:16:57.540 --> 00:17:06.189

Richard Hoehn: So, by the way, so it's sometimes good to always hit. Fetch origin before you start working, because we might have made changes to read me, or who knows what.

180

00:17:06.579 --> 00:17:07.009

Karson Woods: Yeah.

181

00:17:08.300 --> 00:17:10.640

Isaiah: Changes. I always forget how to do it.

182

00:17:12.069 --> 00:17:14.179

Richard Hoehn: Yeah, I mean it. It

183

00:17:15.049 --> 00:17:21.609

Richard Hoehn: get this great until there's a ton of they're called conflicts, and then it it gets so messy.

184

00:17:21.829 --> 00:17:22.619

Isaiah: The heck.

185

00:17:22.979 --> 00:17:23.819

Richard Hoehn: Times.

186

00:17:24.419 --> 00:17:28.309

Richard Hoehn: Sometimes I just give up and delete it download it again.

187

00:17:28.730 --> 00:17:29.350

Karson Woods: Yeah.

188

00:17:29.350 --> 00:17:30.469

Isaiah: I've done that before.

189

00:17:30.640 --> 00:17:31.270

Richard Hoehn: Yeah.

190

00:17:35.470 --> 00:17:36.060

Karson Woods: Yeah.

191

00:17:38.650 --> 00:17:49.000

Richard Hoehn: Well, okay, so I'm gonna work on that bad visualization and bark.

192

00:17:49.450 --> 00:17:55.389

Richard Hoehn: I see you've done a bunch of stuff probably already.
You're kind of the the workhorse of the group.

193

00:17:55.950 --> 00:17:56.580

Richard Hoehn: I don't know.

194

00:17:56.790 --> 00:17:59.441

Isaiah: I'm working on a good visualization for

195

00:18:00.620 --> 00:18:06.519

Isaiah: like your survival rate, based off of like your whether you
were like an adult kid.

196

00:18:06.710 --> 00:18:10.989

Isaiah: And then, like, based off like your status, you're like a 1st
class passenger.

197

00:18:12.690 --> 00:18:13.125

Karson Woods: Hmm.

198

00:18:14.100 --> 00:18:20.659

Karson Woods: yeah, I haven't figured out what kind of visualization
we do yet, but hopefully, the next few days I will know.

199

00:18:20.850 --> 00:18:21.480

Richard Hoehn: Yeah.

200

00:18:24.030 --> 00:18:26.000

Richard Hoehn: But I feel like we're ahead

201

00:18:26.230 --> 00:18:28.389

Richard Hoehn: this time than last time. So that's good.

202

00:18:29.780 --> 00:18:30.520

Richard Hoehn: Okay.

203

00:18:33.090 --> 00:18:37.039

Isaiah: Do we want to try to meet again like next Monday or Tuesday

204

00:18:37.200 --> 00:18:40.570

Isaiah: time? We can get together before we try and submit it.

205

00:18:42.270 --> 00:18:42.810

Richard Hoehn: Windows.

206

00:18:42.810 --> 00:18:44.429

Richard Hoehn: Is it do? Is it due.

207

00:18:44.750 --> 00:18:45.839

Karson Woods: Day and night.

208

00:18:45.840 --> 00:18:46.970

Isaiah: Next Wednesday.

209

00:18:47.180 --> 00:18:54.770

Richard Hoehn: Okay, I have class 6 to 8 on Tuesday, so we could meet beforehand.

210

00:18:56.870 --> 00:18:58.880

Richard Hoehn: Broader not afterwards, though.

211

00:19:00.980 --> 00:19:03.350

Richard Hoehn: Because it's on campus, and then I drive home.

212

00:19:04.120 --> 00:19:04.980

Karson Woods: Okay.

213

00:19:04.980 --> 00:19:11.689

Richard Hoehn: Or I could also meet on Monday evening, too. That would work.

214

00:19:11.965 --> 00:19:12.240

Isaiah: Future.

215

00:19:12.653 --> 00:19:14.720

Richard Hoehn: Or like 5, you know.

216

00:19:15.970 --> 00:19:18.879

Richard Hoehn: Tuesday at 5, 30 or so. That would work.

217

00:19:19.550 --> 00:19:25.960

Karson Woods: Yeah, I mean, oh, you're saying.

218

00:19:35.190 --> 00:19:37.989

Karson Woods: Yeah, I mean for me, anytime works really.

219

00:19:41.830 --> 00:19:43.949

Hector Rogel Jr.: Both of those, and work with me.

220

00:19:51.242 --> 00:19:56.250

Isaiah: I am. Gonna be kind of out of pocket this weekend, so I'll try to get everything.

221

00:19:56.620 --> 00:19:57.170

Richard Hoehn: Yeah.

222

00:19:57.170 --> 00:20:00.040

Isaiah: Take care of before that.

223

00:20:00.550 --> 00:20:00.935

Richard Hoehn: Okay.

224

00:20:06.650 --> 00:20:15.790

Richard Hoehn: Okay, well, let's see, let's see where we are. And then maybe we'll should. We start a new discussion thread for next week?

225

00:20:15.890 --> 00:20:17.279

Richard Hoehn: Kind of thing, too.

226

00:20:17.580 --> 00:20:19.580

Isaiah: You just upload.

227

00:20:21.050 --> 00:20:27.660

Richard Hoehn: You know the one we have, and we'll start another one.

We'll kind of figure out the time and talk about that, and chat a little bit.

228

00:20:28.430 --> 00:20:29.539

Karson Woods: Yeah, that works.

229

00:20:29.770 --> 00:20:32.040

Richard Hoehn: And then we try to do one more Zoom Meeting.

230

00:20:32.940 --> 00:20:37.480

Karson Woods: Yeah. And if not, we can always do one on Wednesday, I imagine, if need be.

231

00:20:38.160 --> 00:20:44.770

Richard Hoehn: Okay, okay, got a good plan.

232

00:20:46.000 --> 00:20:46.770

Isaiah: You guys.

233

00:20:47.150 --> 00:20:48.790

Richard Hoehn: Okay, thanks guys.

234

00:20:48.790 --> 00:20:49.270

Karson Woods: Yup!

235

00:20:49.270 --> 00:20:56.229

Richard Hoehn: Good evening. I'll upload the transcripts and all that to get here in the next. Whenever whenever it's done. Kind of thing.

236

00:20:56.840 --> 00:20:57.410

Karson Woods: Okay.

237

00:20:57.670 --> 00:20:58.892

Richard Hoehn: Okay, bye, guys.

238

00:20:59.340 --> 00:20:59.960

Karson Woods: See you.

239

00:20:59.960 --> 00:21:00.480
Isaiah: No.

240
00:21:00.830 --> 00:21:01.560
Hector Rogel Jr.: Alright, bye.
